Instructions Form E52 - Small Source Product Usage

This form will satisfy the emissions inventory reporting requirement for any small company that can properly identify the low usage of raw materials that contain Volatile Organic Compounds (VOCs)

- Please complete this form in its entirety.
- Be sure to properly identify your company and include your plant ID number, which can be found on your operating permit and the emissions inventory letter from APCD.
- Enter either the NAICS code or the SIC for the type of operation, if known. See the "NAICS" tab for some common codes. The SIC code may be omitted if the NAICS code is supplied.
- List the annual quantities used next to the appropriate category, making sure to state
 the units of measure if the quantity is not stated in gallons. If another VOC solvent was
 used, then please state the material and quantity used after "Other" at the bottom of
 the VOC column, or on a separate sheet of paper that is attached to this form.
- For companies consuming products containing Volatile Organic Compounds, the simplest way to determine the usage is by the inventory method. The beginning inventory of quantities at the start of the year, plus quantities purchased during the calendar year, less the ending inventory of quantities at the end of the year. This result will yield the quantity of product used during the emission reporting year.
- This form must be authorized and signed by the appropriate Company Official.

The "Page Identifier" box at the very bottom is a place where you can enter your own identifier for this copy of this form.

Louisville Metro Air Pollution Control District Form E52 - Small Source Product Usage

Please complete this form for raw materials that contain Volatile Organic Compounds. List only the amount **used** in the calendar year being reported.
